

Dutch Island Pool Cheatsheet

My Pin Code (Needed to Enter): _____

- Walk over to the bar area and find the pool log book.
- If someone has already tested chemicals today, you're good!
- If testing has not been done, grab the Taylor test kit and walk over to the pool
- Verify that you can visibly see the pool drain in the deep end of the pool
- On the exterior wall of the building the bathrooms are on, verify that the throwable ring as well as the safety crook
- Now, using the test kit
 - Sample water from around elbow deep
 - Use your finger to splash out enough water to be even with the marked test line
 - Add 5 drops of R1, followed by 5 drops of R2 into the chlorine side
 - On the PH side, use 5 drops of R4
 - Put the lid on the tubes, flip twice, and evaluate the results
- Walk back over to the pool logbook and record your results
- On the wall, you will see an emergency phone. Pick it up and verify there is a dial tone.

**** If for whatever reason the pool does not meet requirements, please call our pool management company at 912-210-8397**
